

IN THE CLAIMS

1. (Currently Amended) A medicament ~~for with immunotropic activity effective in~~ treating a disease of viral etiology comprising a homeopathically activated ~~one or more homeopathic dilutions of a potentiated~~ form of at least one monoclonal, polyclonal, or natural antibodies to an interferon; wherein said homeopathically activated ~~the potentiated~~ form does not suppress the activity of the interferon ~~and wherein one or more homeopathic dilutions of the potentiated form of antibodies to the interferon being produced by a homeopathic potentiation technology.~~

2. (Canceled)

3. (Canceled)

4. (Withdrawn) A method of treating a pathologic syndrome, whose formation is affected by interferon, distinguished by administering activated forms of antibodies raised to interferon alpha, beta, or gamma in low or ultra-low doses and obtained by multiple consecutive dilutions and exposure to external factors.

5. (Withdrawn) A method of treating pathologic syndrome according to Claim 4 distinguished by the use of a mixture of various homeopathic dilutions.

6. (New) The medicament according to claim 12 ~~4~~, wherein said at least one homeopathic dilution ~~one or more of the homeopathic dilutions~~ comprises one or more centesimal homeopathic dilutions.

7. (New) The medicament of claim 1, wherein said interferon is human interferon.

8. (New) The medicament of claim 1, wherein said interferon is alpha interferon.

9. (New) The medicament of claim 1, wherein said interferon is beta interferon.

10. (New) The medicament of claim 1, wherein said interferon is gamma interferon.

11. (New) The medicament of claim 10, wherein said gamma interferon is a recombinant interferon.

12. (New) The medicament of claim 1, wherein said homeopathically activated form of monoclonal, polyclonal or natural antibody comprises at least one homeopathic dilution.
